

POSING GROUPS

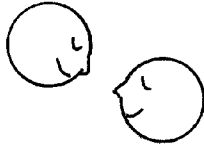

Amateur photographers are often asked to photograph couples, families and groups so the purpose of this article is to help give ideas for posing this type of picture with a view to achieving a more interesting result than the "sports team" type of picture.

(1) Couples

Do not have eyes at the same level in the image and do not have a "gap" between the heads.

"Boy and Girl" couples can also be posed looking at each other.

"Same sex" couples could be placed back-to-back.

(Adjust the height of one so that eyes are not at the same level and there is no vertical gap between the heads.)

For full body shots, try sitting the couple on the floor so that their heads and bodies form a triangle.
